About me

Passionate about aviation, currently working on my private pilot license (PPL) at Beloeil (CSB3). Versatile skillset in mechanical design, electrical circuits and programming.

Education

Université de Montréal	**Certificate in Applied Informatics** 30 credits	Graduated in December 2024
	Introductory courses in programming, database management, web development, object-oriented programming, etc.	GPA 4.02/4.30
Polytechnique Montréal	**Master with thesis (M.Sc.A.)** in Mechanical Engineering, 45 credits	Graduated in March 2022
	Patent (12258690) in progress and publication in fall 2025: "Design and characterization of an active spool tensioner for braiding machines"	GPA 3.57/4.00
	Bachelor in Mechanical Engineering (B.Eng.), 120 credits	Graduated in September 2019
	Three times recipient of the UPIR scholarship for the initiation to the research field of study	GPA 3.14/4.00
École Nationale d'Aérotechnique	**Technical College Degree (DEC)** in aerospace engineering	May 2015 R Score 30.99

Work Experience

Test Specialist, Verification & Validation CAE, Saint-Laurent, Montréal	• Prepare the official documentation supporting the simulator based on the various qualification standards (FAA, EASA, etc.) • Test the simulator using ATM, FCOM, etc. at customer location and validate it behaves the same as the actual aircraft • Ensure a good communication between CAE, the customers and the aviation authorities for the qualification of the simulator	April 2024 to April 2026
Software Integration Specialist Simfinity CAE, Saint-Laurent, Montréal	• LEAN SIX SIGMA GREEN BELT: continuous improvement certificate on the Deployment Checklist • Test the simulator before handing over to pilots (power on, take off, autopilot engage, etc.) • Troubleshoot snags related to the simulator infrastructure or to the software product	March 2022 to April 2024

Mechanical Engineering Intern
GLP Hi-Tech, St-Jean sur Richelieu

Summer 2018

- 3 axis CNC programming using CATIA v5
- Update the machine tooling database and support the CNC programmers
- Tests validation of an automated CAM algorithm that generates the tool path based on the feature recognition of the parts

Mechanical Engineering Intern
Bombardier Aerospace, Pointe Claire, Montréal

Winter 2017

- Make 2D drawing on CATIA and incorporate revision changes
- Incorporate the revision changes in Enovia and ensure the signature process of the newly created drawings
- Support of the various design projects in the team

Skillset

Mechanical Design

- CAD with CATIA (and SolidWorks)
- 3D printing and rapid prototyping
- Systems integration (making things fit together)
- CNC programming (g-code) with CATIA and others
- Machining and manufacturing processes

Electrical Design

- Circuit design for various low-power applications
- Understanding electrical schematics
- PCB design using Autodesk Eagle

Programming

- Python (DAQ, DSP, data analysis using NumPy / SciPy, etc.)
- C/C++ (microcontrollers, multithreading, basic OOP)
- Database design (Microsoft SQL Server)
- HTML / CSS / JavaScript / PHP / MySQL
- Java (OOP, GUI using JavaFX)
- GIT (GitHub, DevOps)

Interests

Learning new programming skills

Data acquisition, management and sharing

Fascination for the Internet of Things

Fascination for machine learning algorithms

Hobbies

Flying drones and filming beautiful scenery

Pilot planes in a simulator using a VR headset

Build robots and machines with my 3D printers

Play strategy games and board games
